**Subject:** Apiary

Hi

Please find attached photos of the apiary in progress.

We now have a small nucleus of Bees that we hope will start to forage and grow.

We would like to put down bark chipping, does anyone know of a tree surgeon that is giving it away? We would need a good few tonnes.

We would also like a shed, again if anyone knows of one available or if there is any more funding that would be fantastic.

We have only put the one vision panel in at the moment but will fit the other once the orchard is near completion.

Kind Regards

James Griffiths
