## Ware Town Council Twitter/X Report March 2025

## Twitter/X Latest Stats

**2952 Followers** (47 lost since November 2024, a possible correlation with US election). There also seems to be a number of dormant accounts of followers who no longer engage with the platform, as indicated by lower impressions.

Comparing the most recent 6-month period (Sep 2024 to Feb 2025) to the previous 6 months of Mar 2024 to Aug 2024 there has been a **77% drop in post impressions**, with 2,920 impressions in the last 6 months (The number of times tweets you published during the time frame were displayed on a person's screen) compared to 12,684 in the 6 months before that.

**However, post engagement rate is up 9%** this period suggesting those who are on the platform remain interested in our content. It is useful for signposting our monthly newsletter and events.

## Hootsuite

All our social media accounts are managed via the Hootsuite social media management platform that means we can manage our accounts, schedule posts and engage with our followers, and analyse performance. We have the ability to manage 10 accounts, we are at capacity with our council, town centre, lido and Priory accounts.

## Bluesky

We secured the Bluesky account for Ware Town Council in November when the popularity of the platform increased. Bluesky runs on a system that is not controlled by any one person or organization. Our handle is @waretowncouncil.bsky.social but we have not promoted our account, posted or tried to attract followers yet.

Unlike Twitter/X, Bluesky doesn't yet have widespread adoption by local authorities. It would be worth us monitoring how the platform evolves and providing another update later this year before we take on managing another platform and building an audience.
